Hi Loren,

Here are the figures from the Radiological Management Plan. Figure 2 shows the areas that are currently under investigation. I don't know about what was investigated back in 2007 or 2008, but Medi Sunga probably knows. Hope this helps with regard to current scope. The executive summary of this report is helpful as an overview of radium and thorium use at TI.

I also let Rusty know about this, but he already was aware of the situation.

Hi David,

Here's the figures from the PDF.
